

PROTECT

Natural Stone, Brick & Concrete Sealers

HYDRO SEAL™ 300 is a versatile waterborne emulsion. This product offers fast and effective protection against UV damage, stains, efflorescence, fungus, mold, mildew and acts as a water repellent. Hydro Seal 300™ protects a wide variety of honed to polished stone, masonry and concrete surfaces for interior and exterior application.

Ideal for:

- Porous travertine, marble and honed granite
- Sills exposed to food and drinks
- Stone Pavers

TAG ZAP™ GRAFFITI BARRIER is a waterborne UV resistant cross linking acrylic finish that acts to shield wood, metal or masonry surface from graffiti. Tag Zap Graffiti Barrier can be applied to painted and unpainted surfaces.

CRP KIT or The Complete Restoration Process kit lets you clean, repair and protect your stone and masonry surface. The two cleaners provide flexibility from mild cleaning to a more

aggressive formulation for tougher stains. The repair material in the kit provide you with a structural bonding epoxy and UV stable patching compounds for granite, marble and limestone. Also included is a system to seal and protect your surface.

CLEAN

Natural Stone, Brick & Concrete Cleaning

BUILDING WASH 3 is a versatile one step building cleaner which is

- Biodegradable—No Phosphates or Caustics
- Contains no acids
- Will not etch glass

designed to remove surface dirt (and also paint oxidation) from painted or non-painted surfaces (without brushing!) when used with high or low pressure washing equipment.

X-190 LIMESTONE, MASONRY & CONCRETE CLEANER

is used in restoring a new appearance to slightly dirty, discolored limestone, poured concrete, masonry, precast, poured aggregate and travertine. X-190 is safe on glass and contains no hydrofluoric acid.

500 LIMESTONE PREWASH is an alkaline-based, liquid cleaning solution used to remove carbon, dirt and other atmospheric stains from soiled and dirty limestone surfaces.

500 LIMESTONE AFTERWASH is a concentrated acidic cleaner formulated for use with 500 Limestone Prewash. 500 Limestone Afterwash will neutralize and remove any traces of 500 Limestone Prewash left behind after rinsing and will brighten the limestone surface.

TAG ZAP™ CITRUS GRAFFITI REMOVER is a citrus solvent blend designed to dissolve graffiti and vandalistic stains such as spray paint, silicone, dyes, marker pens and more from painted and non-painted surfaces.

CITRUS PAINT REMOVERS are designed to remove multiple layers of latex paint, oil paint, varnish, stain and other finishes from natural stone, engineered stone, wood, masonry, plastered walls, mastics, or metal. Also acts as a stain removing poultice for stone and masonry.

600 PRE-THICKENED EFFLORESCENCE AND LIME DISSOLVER is a thick gel that clings to the surface providing a one coat application for the removal of efflorescence and lime, as well as old mortar splatter from brick, concrete and masonry.

600B NEW MASONRY BRICK WASH is an economical cleaner for new masonry installations. It is designed to remove excess grout and clean mortar splatter and staining which occur in new construction. Recommended for use on light colored brick, glazed brick, tile, stone or exposed aggregate - ideal for all types of masonry construction. 600B can be used for removing oil and wax release agents from concrete forms.

ABR-50 is formulated to remove rust from metal surfaces and stains caused by iron deposits impregnated into stone and masonry (i.e. rusted railings imbedded in concrete or natural stone.)

REPAIR

Structural Epoxies & UV Stable Patching & Repair

FAST SET EXTREME is a non-sag epoxy used for setting, pinning, reattaching and laminating. It is mixed 1:1 by volume. This epoxy sets in 15-20 minutes @ 70F. For vertical and horizontal surfaces. Great for use in cold weather.

CLEAR GEL epoxy is a two component non-sag system for structural bonding on vertical or horizontal surfaces. Medium set up time allows for adjusting your stone, concrete or masonry.

LAST PATCH™ LIMESTONE is a UV stable repair compound for limestone, sandstone, and concrete. It absorbs water similar to the substrate surrounding it. Use when you need less noticeable repairs on porous stone. When sanded, the finish replicates saw cuts or rough honed surfaces. Set time: 15-25 min. May be tinted with powdered tints.

(For other stone, see LAST PATCH GEL)

CHIP & FILL KIT features the Last Patch™ Gel UV stable patching compound, an assortment of seven colors of granite dust & seven colors of powdered tints plus mixing & application tools. Everything you need to professionally restore virtually any stone job is at your fingertips! (Accelerator available to reduce scaffold time)

- Patching
- Crack Repair
- Honed, polished & flamed finishes
- UV Stable
- Custom color match-

NATURAL STONE REPAIR KIT was developed for the restoration and repair of granite and marble surfaces. This kit enables you to create on-site color replication of your stone. This kit features the

- Tool box kit
- UV stable
- Crack repair
- Chips
- Patching

Last Patch Gel UV stable patching compound, three liquid tints (black, white and buff) plus mixing & application tools.

LAST PATCH™ GEL is a truly unique two-component system for patching granite and marble. It can be used indoors and outdoors. However, its most distinctive value lies in its outdoor use. LAST PATCH™

- Patching
- Crack repair
- UV Stable
- Quick repair
- Tints available

(For Limestone, Sandstone & Concrete, see LAST PATCH LIMESTONE)
