

Edge System (Flowing)

The ultimate system for laminating granite and marble. The strongest adhesive bond available, this clear, flowing epoxy does it all. It is water clear, polishable, and can be used to lay down a thin, tight bond line. With Edge System, you never have to return to the job site to solve adhesive problems.

Available in Quarts, gallons or 5-Gallon pails

T - 2000

A two component, water cleanable, 100% solids epoxy adhesive compound developed for setting of ceramic tile on horizontal or vertical surfaces. T-2000 forms a thick epoxy bed that allows you to adjust tile, stone, or countertops onto uneven surfaces. This super knife-grade epoxy is also smooth enough for troweling.

Exceeds ANSI-A-118.3 requirements.

Express II (Flowing & Knifegrade)

This two-part clear, odorless epoxy sets up in 45 to 60 minutes and will enable the fabricator to work on the edge in half the time it takes for most epoxies. Since Express II is **WATER CLEAR**, adding tint produces true color. Express II epoxy is great for rodding applications

Available in Quarts, gallons or 5-Gallon pails

Polyester

Transparent polyester adhesives provide superior strength and consistent color matching for natural stone, engineered stone and all countertop applications. Flowing and Knifegrade viscosities available.

- Excellent stability
- Low shrinkage
- Tack free in 10 minutes
- Rapid cure
- Can be tinted with Touchstone colorants

Repair Kit

This unique and convenient kit was developed for the restoration and repair of granite, marble, and limestone surfaces. This kit enables you to create most on-site color replication of your stone. This kit features the Last Patch Gel, an assortment of three liquid tints, plus mixing & application tools. * Chip and Fill Kit also available

- Crack repairs
- Countertop repairs
- Floor & tile restoration
- Fast Setting: 20 minutes
- UV stable
- Patch holds up through severe climate changes

Other Epoxies

There are additional Touchstone® epoxies available for various applications including increased open time for larger assemblies. The longer open time allows for adjustments and color matching needs. Please view the table for your product needs.

Tints

Liquid tints are available in the following ten colors: White, Black, Yellow, Blue, Green, Brown, Red/Brown, Red, Buff, and Gray in 2 oz and 8 oz bottles.
