

Touchstone™ Easy-Mix Dispenser

"Optional heater can be used to keep the epoxy warm-
for colder shops and for faster set times!"

Easy-Mix dispenser sold with or without heater

This is Touchstone's new fabrication shop dispenser. This heavy duty, steel dispenser pumps out your epoxy with the precise 2 to 1 mix ratio. Designed and tested to work with Touchstone Edge System (clear flowing epoxy), Touchstone Penetrating Epoxy, Penetrating RS & Express.

For color matches, you can use two mix cups for the epoxy and hardener to keep them separate until color match is achieved. Add Touchstone tints to color-match the part A, then add the part B from the separate cup.

Touchstone pour spouts are available for flowing and penetrating epoxies. No mess and easy to use.

TOUCHSTONE™
